Environmentally friendly Mapaero primer qualified by Boeing Commercial Airplanes

The latest generation cabin primer FR4-45 manufactured by MAPAERO, the fast-growing manufacturer of aircraft coatings headquartered in Pamiers, France has been qualified by Boeing in the material specification BMS 10-83 Type IV. This specification applies to Boeing's commercial airplanes at manufacturing stage and maintenance.

FR4-45 is a fast-drying, waterborne fire-retardant sprayable and sandable primer used to perfect the surface of cabin parts prior to applying a finish. Already qualified by Airbus and other OEMs, it has one of the lowest VOC on the market, at 50 g/L or 042 lb/gal (ASTM D3960) which can help users comply with the strictest VOC emissions caps.

FR4-45 is available from Mapaero worldwide and already stored in the US. To find a source close to you please visit www.mapaero.com or contact sales@mapaero.com.

About Mapaero:

Mapaero develops and manufactures aircraft coatings according to customers specifications, with a specialty on water-based and other environmentally friendly advanced coatings.

Mapaero's customers include aircraft manufacturers, airlines, MROs, structure, cabin and cockpit OEMs and subcontractors, military aircraft operators and the business aviation community.

MAPAERO has opened a subsidiary in the US in 2014.

Mapaero is a French company created in 1992 by Jean-François Brachotte, with 100 employees and 20 million euros of turnover in 2013.

Worldwide aerospace coatings offer

- 1 Paints for cabin and cockpit interiors designed for OEM and Airlines & MRO activities. Water borne and solvent borne paint. These products combine performance and economic advantages.
They meet with the highest quality and technical requirements :
 - Reduced heat release, flammability, smoke density and toxicity of gases
 - Adhesion on all substrates in the aircraft cabin
 - Excellent cleanability against contaminants
- 2 Water reducible paints for OEM airframes: Protection against corrosion and chemical aggressions.
- 3 Paint for exterior designed for OEM and MRO activities:
 - Civil and military helicopters
 - Civil and military aircraft and business jets
- 4 Special paints providing anti-skid, antistatic, anti-erosion properties

Certifications : ISO 9001, EN 9100 & ISO 14001

Enhanced laboratory capabilities with key expertises

"The Mapaero Team is dedicated to the development of innovative products for the aerospace market and today is seen as pioneers in their field thanks to the ongoing desire to embrace the latest technologies and improve both industry and environmental conditions" Today the Laboratory consists of two key divisions each enjoying their own facilities.

The EPOXY Lab

With more than 20 years of experience in the airframe corrosion protection, the epoxy lab is responsible for supporting the existing business of corrosion prevention and is highly dedicated to the development of Chromate free coatings in the future for metallic and composite parts.

The POLYURETHANE Lab

The polyurethane lab designs new concepts for cabin and exterior finishes, with reduced VOC levels and water based technologies. We are renowned for our wide choice of colors and special effects used in the cabin and cockpit areas.

Environmental : Mapaero is committed to developing eco friendly products with paint formulations in accordance with stringent environmental regulations (REACH for example). Regulations are respected in order to offer sustainable paint solutions.
